- we compost our organic restaurant waste to use next year on the farm
- we provide bicycle racks to encourage in-town bike travel
- we promote the honeybee population by planting fields of wildflowers (which we also use for our table decor!)
- we do our best to grow what we eat! what we can't grow in the summer season we're committed to purchasing locally from our farmer friends whenever possible
- we believe in community over competition! we are proud to support other local businesses when we are out and about
